

# 2015 SCI Winter Agronomy Meetings

During January of 2015 Seed Consultants will again host several Winter Agronomy Meetings across the Eastern Corn Belt. 2014 was a challenging year that everyone can learn from and SCI's agronomy staff will have a great deal of information to discuss. In addition to a review of 2014, agronomists will address important factors that are currently affecting our customers. What is the best herbicide program to control Marestalk? What do I need to know about Palmer amaranth? Do foliar sugar applications increase corn and soybean yields? Did fungicide applications pay in 2014? Why were leaf diseases on corn so prevalent in 2014? For answers to these questions and more, make sure to attend a Winter Agronomy Meeting in your area.

## DATES AND LOCATIONS:

*(All meetings will begin with lunch at 11:30 a.m.)*

DATE	LOCATION	RESTAURANT
